### VITALINE NUTRI FOODS PVT. LTD. - A Venture of Tulsi Agro Group

At Vitaline, we are dedicated to producing a comprehensive range of high-quality premixes for the fortification of foods. As a proud venture of the Tulsi Agro Group, we specialize in crafting premium food-grade micronutrient premixes tailored for a wide array of food and beverage applications.

Our premixes are meticulously developed to ensure products not only meet but exceed Global Nutritional Standards effectively addressing diverse dietary deficiencies. Designed to enhance the nutritional profile of foods, our solutions empower brands to deliver fortified, functional and health-enriched products to consumers worldwide.

Each Vitaline Nutrition Premix undergoes strict formulation and rigorous quality testing to guarantee consistency, efficacy and safety.

We operate from a modern, state-of-the-art production facility located in the Rajkot Industrial Area, enabling us to meet the evolving demands of the global food industry with excellence and innovation.

**QUALITY DEFINES OUR IDENTITY**

PRODUCT SECTION WILL  
FEATURE TWO CATEGORIES

1. NUTRITION PREMIXES
2. INGREDIENTS

## OUR PRODUCTS

- FRK Premix
- Baby Food Nutrition
- Milk Fortification Premix for Powder/ Liquid
- Maize Flour Premix
- THR Premix
- Maida Premix
- Micronutrient Premix for customized product
- Wheat Flour (Atta) Premix
- Bakery Food Premix
- Premix for Fortified Juices
- Premix for Sports & Lifestyle Nutrients
- Early Life Nutrition Premix (Infant Formula Blend)
- Spice Fortification Premix
- Oil Fortification Premix
- Salt Fortification Premix

We specialize in the supply of premium food-grade raw materials for vitamins and minerals, catering to the diverse needs of the food and beverage industries. Our product range includes essential micronutrients that meet premium quality and safety standards making them ideal for applications such as food fortification, dietary supplements, functional foods and health-focused formulations. Each ingredient is sourced from trusted manufacturers and undergoes rigorous quality control processes to ensure consistency, purity and compliance with global regulatory requirements. By offering these high-grade materials, we aim to support our clients in delivering scientifically backed, nutrient-rich products to the market.

### **FRK Rice (Fortified Rice Kernel)**

This premix is used to make rice healthier by adding nutrients like iron, folic acid and vitamin B12. It blends with regular rice to help fight anemia and is ideal for public health programs focused on improving basic diets in large populations.

### **Baby Food Nutrition**

Specially designed for infants and toddlers, this premix includes essential vitamins and minerals needed for healthy growth. It is used in cereals and pureed baby foods to provide balanced nutrition during early development following safety and health standards for infant care.

### **Milk Fortification Premix for Powder/Liquid**

This premix adds important nutrients like vitamins A and D to both liquid and powdered milk. It helps improve bone and immune health, making milk more nutritious for all age groups without affecting taste, texture or shelf life.

### **Maize Flour Premix**

Ideal for communities where maize is a staple food, this premix includes iron, zinc and B vitamins. It improves the nutritional value of maize flour, helping reduce nutrient deficiencies through a simple addition to daily meals.

### **THR Premix (Take-Home Ration)**

Used in government nutrition programs, this premix adds vital nutrients like iron and folic acid to ready-to-cook food mixtures. It supports the health of pregnant women, mothers and children, helping improve nutrition through distributed food rations.

### **Maida Premix**

This premix fortifies refined wheat flour (maida) with key nutrients like iron and folic acid. It is widely used in bakery and snack items making commonly consumed foods healthier without changing their appearance or taste.

### **Micronutrient Premix for Customized Product**

Tailored to your specific product needs this custom premix combines vitamins, minerals or functional ingredients to boost nutrition. It is suitable for a wide range of food and drink products and ensures consistent quality, stability and regulatory compliance.

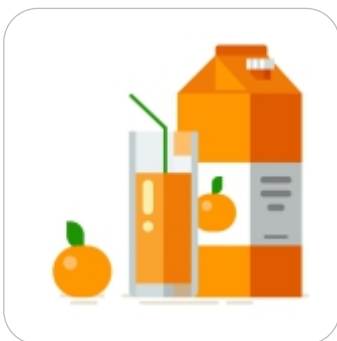

### **Wheat Flour (Atta) Premix**

Designed for fortifying whole wheat flour this premix adds iron, folic acid and vitamin B12. It helps reduce deficiencies such as anemia and improves the health value of everyday food like chapatis and bread.

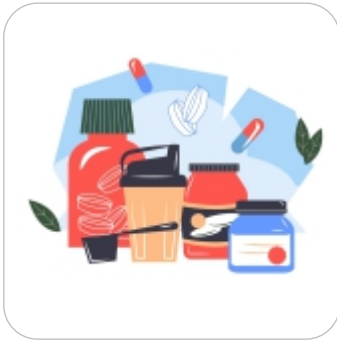

### **Bakery Food Premix**

This premix is used in breads, biscuits and cakes to add nutrients like iron and B vitamins. It ensures nutritional value is retained during baking, helping meet consumer demand for healthier bakery options.

### **Premix for Fortified Juices**

Formulated to add vitamins like A, C and D to fruit juices, this premix is easy to use and stable in liquid. It helps improve immunity and energy without affecting the taste or appearance of the drink.

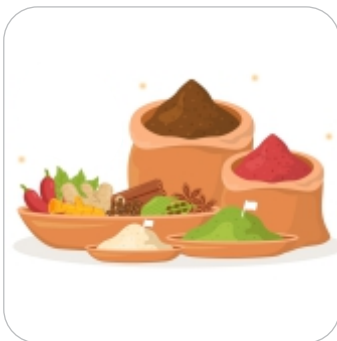

### Premix for Sports & Lifestyle Nutrients

Created for active individuals this premix includes proteins, amino acids, vitamins and minerals. It supports physical performance, energy levels and recovery. It is used in fitness drinks, bars, and supplements.

### Early Life Nutrition Premix (Infant Formula Blend)

This premix provides essential nutrients like DHA, vitamins and minerals for infants. It supports healthy brain development and growth. It is used in infant formula products to meet strict safety and nutritional standards.

### Spice Fortification Premix

This premix adds nutrients like iron and vitamin A to everyday spices. It delivers health benefits through familiar foods without changing taste or color offering a simple way to improve nutrition in daily meals.

### Oil Fortification Premix

Oil Fortification premix adds vitamins A and D to cooking oil, helping improve eye, bone and immune health. It's heat stable and keeps the oil clear, making it ideal for household or commercial oil products.

### Salt Fortification Premix

This premix provides iodine and iron to fight common deficiencies. It keeps salt stable and effective, supporting national health programs and improving everyday nutrition at the household level.

# INGREDIENTS

- Ammonium Chloride
- Ascorbic Acid
- Calcium Carbonate
- Calcium Propionate
- Citric Acid Anhydrous
- Citric Acid Monohydrate
- Copper Sulphate Pentahydrate
- Di Potassium Hydrogen Phosphate (DPP)
- Dicalcium Phosphate Anhydrous
- Dicalcium Phosphate Dihydrate
- Distilled Monoglyceride (RIDE D 100)
- Electrolytic Iron• Ferric Orthophosphate
- Ferric Pyrophosphate• Ferrous Fumarate
- Ferrous Sulphate
- Glycerol Monostearate (RIDE G 100)
- Guar Gum
- Heavy Magnesium Oxide
- HVP (Hydrolyzed Vegetable Protein)
- I + G (Disodium – 5' – Ribonucleotide)
- L-Cysteine Hydrochloride
- Lite Magnesium Carbonate
- Lite Magnesium Oxide
- Magnesium Carbonate
- Sodium Hydroxide
- Sodium Iron EDTA
- Sodium Metabisulphite
- Sodium Molybdate
- Sodium Phosphate Dibasic Anhydrous
- Sodium Tripolyphosphate
- Sorbic Acid
- SSL (Sodium Stearoyl Lactylate)
- Supistam Plus

- Magnesium Chloride
- Magnesium Stearate
- Magnesium Sulphate Heptahydrate
- Malic Acid
- Manganese Sulphate Monohydrate
- Monoacid Calcium Phosphate (MACP)
- Potassium Carbonate
- Potassium Chloride
- Potassium Phosphate Dibasic
- Potassium Phosphate Monobasic
- Potassium Sorbate
- Reduced Iron
- Silicon Dioxide
- Sodium Acetate Anhydrous
- Sodium Acetate Trihydrate
- Sodium Acid Pyrophosphate
- Sodium Bicarbonate
- Sodium Bisulphite
- Sodium Carbonate Anhydrous
- Sodium Carboxy Methyl Cellulose
- Sodium Chloride
- Sodium Citrate
- Sodium Citrate Tribasic
- Sodium Dihydrogen Phosphate Dihydrate
- Sodium Hexametaphosphate
- Tartaric Acid
- Tertiary Butylhydroquinone
- Titanium Dioxide
- Tribasic Calcium Phosphate (TCP)
- Vital Wheat Gluten
- Xanthan Gum
- Zinc Oxide
- Zinc Sulphate Heptahydrate
- Zinc Sulphate Monohydrate
